Abstract View references (30)

It has been reported in printed and electronic media that moral decadency among Malaysian adolescents is on the rise.² Such decadency is attributed by a host of “nature versus nurture” debatable factors. This study aims at describing the moral awareness and cultural conformity of Malaysian adolescents . A questionnaire was administered on 200 respondents. Preliminary findings indicated that the respondents’ conformed positively to their cultural expectations (M= 3.92; SD=.92) and have positive moral awareness is (M = 4.40; SD =.85). These findings were perceived instrumental to the current classroom managements, school counseling services and choice of parenting styles in Malaysia. © 2018, International Islamic University Malaysia.
